Assignment

My name is Mohamad Talib and I come from a city named Gorakhpur, Uttar Pradesh.I completed my graduation in sociology from Deen Dayal Upadhyaya Gorakhpur University in 2019 where my experience was good and in the meantime I joined politics and become chief of samajwadi yuvajan sabha in 2020 after coming in politics and facing the dirty reality of it. I chose to leave it and after leaving, my interests increased in Artificial Intelligence and Machine Learning. While browsing the internet I started learning from Online sources and done some certification courses, I observed how data driven approach has changed the industry over last century. I think data is the new oil and, in the decades, to come it is going to be the key factor in technological evolution. I have been looking for opportunities in the data science field and failing to fulfill the criteria of most organizations i.e., bachelor's degree. I found Edyoda digital university's Data Science course and this course will help me boost and excel in my career path and provide me with ample of opportunities to learn Data Science in depth.
